Hi, Betsy:

Thanks for catching the spelling. Much of the document was cut and pasted from other documents.

"Cleaning the utility corridors" means cleanups in streets where city infrastructure is located, like sewer lines, gas lines, water lines, etc. This is not something we typically do since the waste is managed in place and can be safely handled when utility work is required.

With respect to your earlier email about the comment letter from Bill Everett, we do have a draft response that we can get to you later today. That draft response details which of his comments we can address and which we cannot accommodate at this time. I also have attached the fact sheet for community soils that explains the cleanups for arsenic, the remedy change to include lead, and the cleanups currently underway. Please let me know if you have additional questions.

Thank you,

Joe

JoeI reviewed this last night, and while it is long it is packed with great info.

A quick question:

Pg 3 – what does clean the utility corridors mean?

Acres on the last page is misspelled several times, but I can take care of that.

Hi, Betsy:

This version is revised based on input from Charlie.

Thank you!

Joe

Subject: FW: Anaconda Status Update/Briefing/Talking Points

Hi, Betsy:

I haven't yet heard back from Charlie or Robert, but I wanted to get this to you. As I stated below, it is too long, but it would be easy to cut out the entire second half from the Q&A to the end. I'll send you any revisions I get from Charlie and Robert. Please let me know if you have questions or if you require additional explanation.

Thank you,

Joe

Subject: Anaconda Status Update/Briefing/Talking Points

Hi, Charlie and Robert:

I put Charlie's "plan" together with Robert's previous event plan. It's too long, but we can trim it down as needed. I tried to put talking points for Doug (for his discussion with Albert Kelly) up front, with Charlie's plan for addressing the county's needs to follow. I included the Q&A and other information after that, which we can cut if necessary. I'm trying to get these to Betsy very shortly.

Thanks,

Joe
